

# Weatherwall™

By Strukturoc, Inc.

*Dependable Wall Systems, Built To Last.*

- AirGuard™ is a liquid air and vapor barrier that may be rolled or sprayed on the exterior sheathing. Transition tape is also available.
- Rigid insulation per the architectural specification per project.
- 20 gauge rigid insulation trims are attached to the wall sheathing and act as both an insulation trim and hat channel for the panel to be attached.
- Strukturoc wall panels are 20 gauge panels. The textured panel is available in 24 standard colors and the embossed panel is available in 6 standard colors. Custom colors are available, please contact Strukturoc for information.

One supplier for your metal wall panels, insulation and air barriers.
