

Perforated plate

The ideal surface for enhancing structural acoustics through the use of round holes and a stone wool insulating core. Available in standard grey white (RAL 9002), other colours available on request.

Surface type

interior | exterior

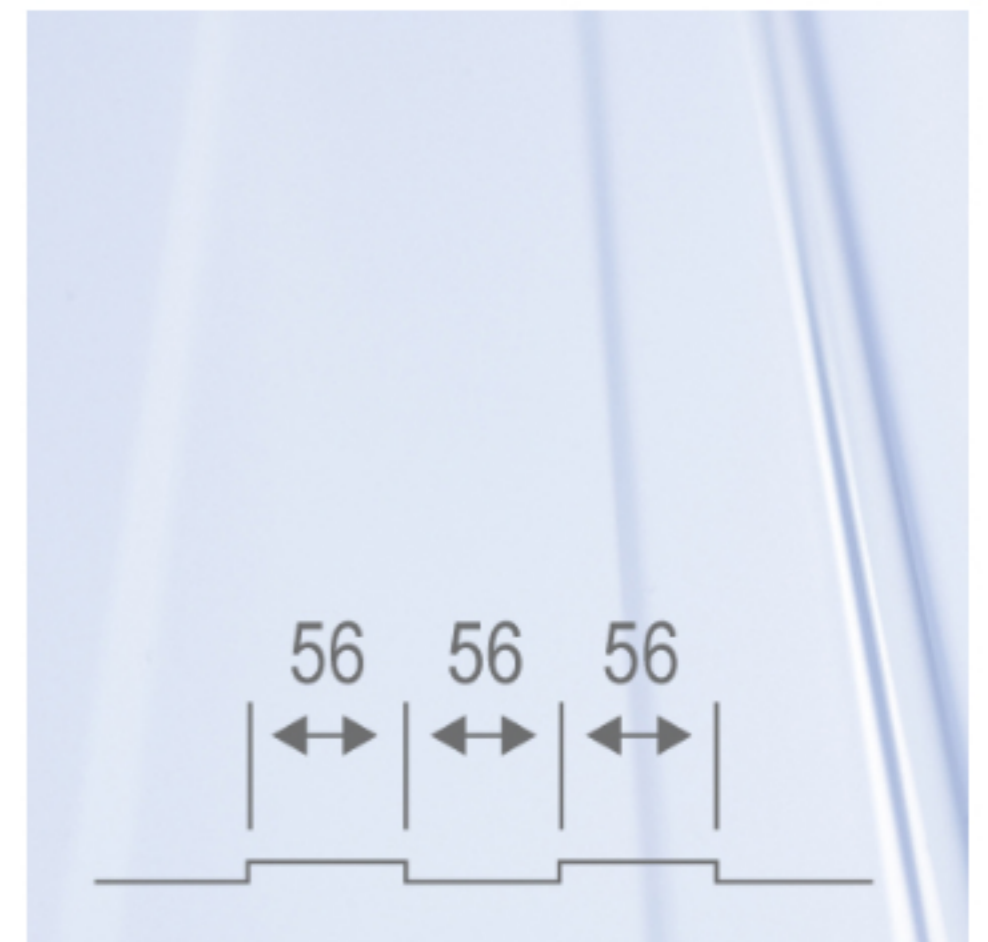

Lined

Streamlined, timeless and robust. The classic surface design.

Surface type

interior | exterior

Smooth¹

Smooth surfaces are easy to clean and recommended for use in areas subject to strict hygienic standards.

Surface type

interior* | exterior*

* special coating

¹ undulations within the range of tolerance may be more obvious on smooth surfaces when light conditions (e.g. position of the sun) are not favourable.
