AG2000

AIRGUARD™ - Building Moisture Barrier

Protect your building with AirGuard moisture barriers. ABBA certified moisture barriers are easily sprayed or rolled on to the exterior surface. Along with other flashing and tapes this will provide a full enclosure to guard against moisture and air conductivity through the exterior wall. Pick out of the three standard formulas's and rest easy knowing your building is protected from the elements.

FEATURES:

- ☑ A non permeable, solvent based formula
- ☑ AG2000 is a rubberized polymer elastomeric air/vapor and liquid moisture barrier
- ☑ The product can be applied by brush, roller or sprayed
- ☑ **Unlike the AG3000 it can be applied at temperatures as low as -10° F**
- ☑ UV resistant for 12 months
- ☑ Leed Points
